### **GROUP BENEFITS**

Your employees are a valuable asset to your company and you look for ways to attract, motivate, and retain them. By offering a group retirement and savings plan you can help protect this asset as you provide your employees with a convenient and affordable way to build and secure their future retirement.

It's not just about your employees. There are real benefits to your company when you offer a group retirement plan. It can help you:

- Attract talent—Quality people look for jobs offering attractive compensation packages that include group retirement plans.
- Retain talent—Your employees are less likely to leave for other employers who offer plans.
- Reduce business costs—Less employee turnover means lower hiring and training costs
- Save money—Contributions to a deferred profit sharing plan (DPSP) or employer contributions to a group registered retirement savings plan (RRSP) can, in some cases, reduce your payroll expenses.
- Create goodwill—Employees will appreciate your commitment to helping them save for their retirement.

Specialty Wealth & Financial has been advising other local businesses on how to offer cost-effective group retirement plans for their employees. Our clients have found that these plans help them keep quality people who make their businesses grow and prosper.

#### **As your group broker, we will provide:**

- Experienced consultation to help you choose an appropriate plan for your business and employees
- Assistance in educating employees on the benefits of joining a plan
- Personalized, no-cost consulting services for employees on their overall financial security planning
